**Microsoft PowerPoint** is a presentation program,<sup>[1]</sup> created by [Robert Gaskins](#) and [Dennis Austin](#)<sup>[2]</sup> at a software company named [Forethought, Inc.](#)<sup>[3]</sup> It was released on April 20, 1987<sup>[4]</sup> initially for [Macintosh](#) computers only.<sup>[5]</sup> [Microsoft](#) acquired [PowerPoint](#) for about \$14 million three months after it appeared.<sup>[6]</sup> This was Microsoft's first significant acquisition,<sup>[1][7]</sup> and Microsoft set up a new business unit for [PowerPoint](#) in [Silicon Valley](#), where [Forethought](#) had been located.<sup>[1][8]</sup>

[PowerPoint](#) became a component of the [Microsoft Office](#) suite, first offered in 1989 for [Macintosh](#)<sup>[9]</sup> and in 1990 for [Windows](#),<sup>[1][10]</sup> which bundled several Microsoft apps. Beginning with [PowerPoint 4.0](#) (1994), [PowerPoint](#) was integrated into Microsoft Office development, and adopted shared common components and a converged user interface.<sup>[1][11]</sup>

[PowerPoint's](#) market share was very small at first, prior to introducing a version for [Microsoft Windows](#), but grew rapidly with the growth of [Windows](#) and of [Office](#).<sup>[4][12]</sup> Since the late 1990s, [PowerPoint's](#) worldwide market share of presentation software has been estimated at 95 percent.<sup>[1][13]</sup>
